Program

Setting up a Management Package

Course description

There are many reasons for introducing profit-compensation models or incentive schemes. The focus is on increasing the motivation of founders, managers and employees, involving them in the development of the company and binding them to the success of the company in the long term. High performers are encouraged to improve their performance and are additionally motivated by equity participation. These management packages are used in both public and private companies. This course presents the legal aspects of the most important participation instruments and evaluates their advantages and disadvantages, especially from a tax perspective.

Course Objectives

- Knowledge of the different types of equity instruments
- Understanding of the main legal and tax issues related to management participations
- Dealing with management participations in the context of private equity transactions

Continuing education topics:

- **Types of compensation**
 - Salary
 - Bonus
 - Equity participations
- **Share-based compensation**
 - Various equity instruments:
